Statewide Survey Campaign 2017

Your department and the California Department of Human Resources (CalHR) are partnering to collect demographic information from all California state employees. This one-time survey will help determine whether hiring practices are fair and equitable, and to gauge the success of efforts to recruit and retain a diverse workforce.

Race & Ethnicity Choice
Employees can now choose to designate themselves as “multi-race” or recertify their race.

Veteran Status
Employees who did not participate in the Veteran Preference Program upon hire have the opportunity to update their veteran status.

Disability Awareness
Employees who meet federal and state disability standards may now be counted, and can select more than one disability.

Federal and state law requires the State of California, through CalHR, to collect specific demographic information from its workforce to ensure that the state is meeting its obligations as an Equal Opportunity Employer. Please contact your EEO Office for more info.
