Overview

This compensation survey is prepared by the Department of Human Resources (Department) pursuant to Government Code section 19827 and the Memorandum of Understanding (MOU) between the State of California and the California Association of Highway Patrolmen (CAHP).

MOU Survey Requirement

The MOU between the state and CAHP has a term of July 1, 2019 through June 30, 2023. The Side Letter agreed to on June 4, 2021, extends the MOU through July 3, 2024. The state is required by Government Code section 19827 and the terms of the MOU to continue providing California Highway Patrol Officers with general salary increases (GSI) based upon the lag in this survey.

Government Code Section 19827 Survey Requirement

Government Code section 19827 requires the Department and CAHP to jointly and annually:

- Survey five specific public law enforcement organizations and calculate the estimated average total compensation. The components of total compensation are identified.
- Project the average total compensation ahead to July 1 of the year in which the survey is conducted.
Survey Methodology—Description of Survey Process Pursuant to Government Code Section 19827

Attachment 1 displays the survey methodology, including the law enforcement organizations and classifications to be surveyed. The methodology requires:

- The survey to measure and report on salary range maximum, patrol bonuses, seniority pay (also known as longevity or retention pay), physical performance pay, Peace Officer Standards and Training (POST) and other education incentives, and the employee contributions to retirement.¹
- The use of an average entry age of 24 years, when the employee’s retirement contribution rate varies based on age in the surveyed organizations.
- The CAHP is to verify the survey compensation and staffing data collected by the Department.
- The Department and CAHP will finalize the survey findings by March 31 of each year as data is projected to July 1. A 2013 contract addendum provides that if an agency for which a projection has been made resolves its contract after March 31 but before the State Controller’s cutoff date for the July pay period, then the survey must be adjusted to reflect the actual figures of the new agreement.
- The Department is to provide survey information on an Excel spreadsheet.

¹ Government Code section 19827, subdivision (a) (1) requires that total compensation include retirement contributions made by the employer on behalf of the employee. The Description of the Survey Process (Gov. Code, § 19827.) does not require that total compensation include retirement contributions made by the employer on behalf of the employee. Per past agreement between CAHP and the Department, the survey follows the Description of the Survey Process requirement.
The survey’s intent is to include the classification that most closely matches the California Highway Patrol (CHP) Officer, Range A. The following organizations and classifications are identified in the methodology to be included in the survey.

<table>
<thead>
<tr>
<th>Organization</th>
<th>Surveyed Classification</th>
</tr>
</thead>
<tbody>
<tr>
<td>San Francisco Police Department</td>
<td>Police Officer Q2²</td>
</tr>
<tr>
<td>San Diego Police Department</td>
<td>Police Officer II</td>
</tr>
<tr>
<td>Los Angeles County Sheriff’s Department</td>
<td>Deputy Sheriff</td>
</tr>
<tr>
<td>Los Angeles Police Department</td>
<td>Police Officer II³</td>
</tr>
<tr>
<td>Oakland Police Department</td>
<td>Police Officer</td>
</tr>
<tr>
<td>California Highway Patrol</td>
<td>CHP Officer, Range A</td>
</tr>
</tbody>
</table>

The methodology determines the percent by which the CHP Officer weighted compensation leads or lags the combined weighted average compensation of the five surveyed organizations.

² In the Description of the Survey Process (Gov. Code, § 19827.) document, the surveyed classification is Police Officer III Q4. This is the Police Officer having a POST Advanced Certificate. However, per past agreement between CAHP and the Department, the surveyed class was changed to Police Officer Q2, which is the officer having the POST Basic Certificate. To meet the intent of the Survey Methodology, the Police Officer Q2 more closely matches the CHP Officer, Range A.

³ In the Survey Methodology, the surveyed classification is Police Officer II. However, per past agreement between CAHP and the Department, the weighted average salary is computed based on the combined count of Police Officer I, II and III incumbents. The reason is that the Field Training Officer function of the Police Officer III duties is the same as the Field Training Officer function of the CHP Officer, Range A, duties. The Police Officer III class is an assignment to a higher pay grade for a position carrying greater responsibility or requiring greater expertise. The Police Officer I is the cadet class.
2021 Survey Lag Computation

Attachment 2 is the computation to determine if the compensation for CHP Officers leads or lags the weighted average for officers in the surveyed organizations. The survey methodology is summarized as follows:

- The survey individually weights each organization’s patrol bonus, seniority, physical performance, and POST/education incentive pays by the number of officers receiving those incentives which is then added to the maximum base salary for a subtotal compensation. The employee share of retirement, which is determined by multiplying the average employee contribution rate by the above subtotal compensation, is subtracted from the subtotal compensation for each organization’s total compensation. In addition, the employee’s contribution to pre-fund OPEB is also subtracted from the total compensation.
- To find the total compensation for the surveyed organizations, each item listed above (maximum salary and incentive pays) is collectively weighted and summed, and the weighted employee share for retirement and OPEB is subtracted.
- The CHP Officer compensation and surveyed organizations’ compensation are compared to determine the percent by which the CHP Officer leads or lags the surveyed organizations’ compensation.
- A simple average of the tiered retirements for each jurisdiction will be used for the duration of the contract.
- Per the June 4, 2021 Side Letter Agreement, the Survey shall reflect an employee contribution to OPEB of 3.4 percent for CHP officers.

Survey Results

The compensation for a CHP Officer is currently 5.1 percent below the weighted average compensation of the surveyed organizations.

Executive Summary of Process

Executive Summary

This document presents the survey methodology and process for the Department of Personnel Administration's survey of five jurisdictions pursuant to Government Code section 19827. In addition, this methodology and process is to be used for any future surveys performed under this section.

Government Jurisdictions Surveyed for Job Matches:

- San Francisco City
- City of San Diego
- Los Angeles County
- City of Los Angeles
- City of Oakland

Compensation Items to be Surveyed:

- Salary Range Maximum
- Patrol Bonuses
- Seniority Pay
- Physical Performance Pay
- Post/Education Incentives
- Employee Contribution to Retirement

Survey Timing and Effective Date

The parties will finalize survey findings prior to March 31\textsuperscript{st} of each year. Per Government Code section 19827, survey data is projected to July 1\textsuperscript{st}.

Use of Weighted Average

Calculations use numbers of employees receiving compensation multiplied by the amount paid and divided by the survey population to produce the “weighted average.”
Introduction/Background

This survey is produced by the Department of Personnel Administration, in cooperation with the California Association of Highway Patrolmen (CAHP) pursuant to:

Government Code section 19827:  (a) In order for the State to recruit and retain the highest qualified employees for the California Highway Patrol, it is the policy of the State to compensate State traffic officers the estimated average total compensation as of July 1 of the year in which comparisons are made for the rank corresponding to State traffic officer within the Los Angeles Police Department, Los Angeles County Sheriff's Office, San Diego Police Department, Oakland Police Department, and the San Francisco Police Department. Total compensation includes, but is not limited to, salary, retirement, health and dental insurance, educational incentives, longevity pay, night shift differential, and other skill or incentive pay. Any increase in total compensation resulting from this subdivision shall be implemented through a memorandum of understanding negotiated pursuant to the Ralph C. Dills Act (Chapter 10.3 [commencing with Section 3512] of Division 4 of Title 1). If the provisions of this subdivision are in conflict with the provisions of a memorandum of understanding reached pursuant to Section 3517.5, the memorandum of understanding shall be controlling without further legislative action, except that if the provisions of a memorandum of understanding require the expenditure of funds, the provisions shall not become effective unless approved by the Legislature in the annual Budget Act.  (b) When determining compensation for State excluded sworn classifications of the California Highway Patrol, it is the policy of the State to consider total compensation for corresponding ranks within jurisdictions specified in subdivision (a), as well as other factors, including internal comparisons.

Methodology

The survey considers salary rates paid to rank and file officers in five California local governments, law enforcement agencies: San Francisco City Police, City of San Diego Police, Los Angeles County Sheriff's Office, City of Los Angeles Police, and City of Oakland Police. Both the Department of Personnel Administration and the CAHP have access to information and agree to cooperate in the collection and analysis of data necessary to complete this survey. The parties may review these job matches from time to time, but it is the intent of the parties to utilize the classification in the jurisdiction that most closely matches the "CHP Officer, Range A." The surveyed classes in the local government jurisdictions are currently San Francisco City - "Q-4" classification; San Diego City - "PO II" classification; Los Angeles County - "Deputy Sheriff" classification; Los Angeles City - "PO II" classification; and City of Oakland - "Police Officer" classification.

Identifying Compensation Items to be Surveyed

In determining 2001 survey findings, the DPA studied compensation items paid to CHP officers and officers in the survey jurisdictions. The DPA and CAHP determined that the significant
items to be measured and reported were base salary, patrol and incentive bonuses, seniority pay, physical performance pay, POST and other education incentives, and employee contribution to retirement. The parties agree that any pay or incentive items added to the survey must be significant items in order to be reported in the survey. In the original study, some items were studied but not reported due to the direct comparability of the items between jurisdictions or that there was de minimus effect of those items.

**Survey Estimates to July 1st**

The parties will finalize survey findings prior to March 31st of each year as data is projected to July 1st. The parties may also provide periodic survey updates thereafter and meet to review findings. Projected figures will take into account salary schedule adjustments occurring on July 1st or during that fiscal year. As an example, if a 4 percent adjustment is to be granted on July 1st, and another 4 percent adjustment on January 1st, then the total impact of the increases for the fiscal year would be 6 percent. This annualized change is based on the 4 percent on January 1st being an annualized 2 percent base salary increase. This annualized 2 percent, when added to the 4 percent increase on July 1st increase, brings the total annualized increase to 6 percent. In the event that a jurisdiction is in the process of negotiating economic terms, the parties may use reasonable projection methods including past history of the jurisdictions and reasonable estimates of anticipated settlements.

**Use of Weighted Average and Additional Information**

In reporting data, survey information will be provided by the DPA on an "Excel" spreadsheet using a format provided by the Office of Financial Management, DPA. The spreadsheet enclosed with this report shall be the format for presenting survey findings under this section. Further, various worksheets for the determination of various special pay items actually included in the survey findings will be documented on a "Word" format. Agreements reached by jurisdictions engaged in negotiations prior to July 1st would be taken into account.

The DPA will collect compensation and staffing data from the jurisdictions and from the State Controllers' Office (SCO) and the CHP, Office of Labor Relations for CHP Officers. Data will be provided to CAHP and verified. In turn, CAHP will provide salary rates and incentive pays for each jurisdiction based on information provided by the unions and their respective MOUs. The DPA will confirm these figures. Calculations will use the numbers of employees receiving compensation items surveyed multiplied by the amount paid and divided by the survey population to produce the "weighted average."

Salary will be determined by utilizing the top step of the surveyed class in each jurisdiction. Incentive pays will then be added to arrive at a subtotal for compensation before subtracting the employee's contribution to retirement. In jurisdictions where the employee’s retirement contribution varies based on age, an average entry age of 24 years will be utilized.
