During the 2001 negotiations between the International Union of Operating Engineers and the State, we agreed to support a Joint Apprenticeship Committee to promote training opportunities in the craft and maintenance occupations.

The union and management have established apprenticeship standards for the carpenter, electrician, painter, and plumber apprentice classifications. Attached are the apprenticeship standards for these programs.

In addition, Locals 39 and 501 have journeyman upgrade training courses available through their training programs. Many of these courses are available at no expense to the State employer. If you are interested in information regarding the training programs mentioned above, please contact or access their on-line training information:
